ESAS

Aesthetic Surgery is now accepted and recognized in many countries, all over the world.

European Society of Aesthetic Surgery is new born in papers, but in fact has a long history, organizing since 1997, International Congresses in different countries, every year.

Our leading group, which includes famous plastic surgeons from different european countries, had a great contribution to the development and recognition of this new speciality.

We are dedicated to elevate aesthetic surgery to a very high standard. Our aims and purpose is to exchange knowledge, educate and share the exciting progress in this new field. Please do not miss the chance to join this prestigious society.

At this congress, many internationally renown surgeons, will come to exchange new techniques and demonstrate their skills, in the most friendly atmosphere.

Doctors who will attend this meeting, will not only refresh their knowledge, but also, will learn new surgical and non-surgical procedures and techniques useful in their practices.

On behalf of the organizing committee of the **European Society of Aesthetic Surgery**, it is my great pleasure to welcome you all to attend and participate in this historic and prestigious event.

This first international congress of European Society of Aesthetic Surgery, organized in conjunction with Romanian Aesthetic Surgery Society, is dedicated to celebrate the official adhesion of Romania in the European Community, recognizing also, the great value of Romanian Aesthetic Surgery Society.

Prof. ANTHONY ERIAN

President
European Society of Aesthetic Surgery
